

# The Virtual School and LA Data Analysis Solution

Groupcall VS facilitates the centralisation of school data in real-time.

The solution improving information awareness, and reducing data collection and administrative overheads.

## The Virtual School Solution

### Groupcall VS

With an array of MIS systems at school level, the process of collating data and requesting reports can be inefficient and time consuming for Virtual Schools and Local Authorities. Groupcall VS offers a window into your school level data, facilitating effective and convenient analysis of information resulting in improved data awareness and data management. Powered by Groupcall Xporter, Groupcall VS is completely MIS agnostic and adds a new layer of value to the extracted school data by presenting it in a user-friendly format.

### Available Data

Comprehensive range of LA wide data available in one centralised application

#### Complete pupil details including:

- o PEP (Personal Education Plan)
- o Core pupil information
- o Assessment results
- o Parent/Guardian contacts
- o SEN details
- o Admissions
- o School history
- o Current enrolment
- o In-Care details
- o Exclusions
- o Attendance records
- o PRU Attendance and Pupil Records
- o Behaviour details

### Document Management

Reduce administrative overhead by managing documents in a controlled and secure process using the Groupcall VS document management feature.

Using the Groupcall VS document management feature, documents can be uploaded and linked to a pupil, reducing the offline management of documents and reports. In addition, notes and comments can be created and associated with a pupil, all

accessible by authorised personnel from one centralised location.

### PEP Management

Automated PEP (Personal Education Plan) report generation and management is available within Groupcall VS.

Traditionally PEP documents for a child in care are manually created for each child within a Virtual School or LA. With Groupcall VS, template based documents are generated depending on the child's year group and auto-populated with their relevant details. The PEP document can then be distributed to all relevant parties for completion offline. Once completed, the document is uploaded to the pupil's account within Groupcall VS and managed centrally. PEP reporting within Groupcall VS is a time-saving feature, which reduces the requests for data between Virtual Schools, LAs and individual schools.

Access, Deployment and Security Secure browser based access; fully hosted or deployed locally.

Depending on requirements, Groupcall VS is available as a fully hosted, cloud-based solution using the latest in SSL security technology. Alternatively, secure local hosting is also an option. Regardless of deployment, Groupcall VS can be accessed through any web browser and requires no installation of a client application.

### Attendance Tracking

Teachers are able to view at a glance the attendance figures for any pupil in the virtual school. Summary information regarding absences and other attendance marks are displayed for the entire year, term or specified time frame by simply selecting a required date range.

## ATTENDANCE

The representation of pupil attendance provides the ability to view up to date attendance and visually spot potential attendance issues and patterns.

**DOCUMENT MANAGEMENT**  
The built-in document management system allows teachers to upload and share documents. In addition, the system provides the ability to store free-form notes that can contain links and formatted text.
