

Introducing Apple Pay and Google Pay as payment options with WisePay

We are delighted to announce that your school has been included in a pilot for the introduction of Apple Pay and Google Pay as new payment options at checkout with WisePay.

These secure, convenient and simple payment options will speed up routine meal top-ups and shop purchases for you, meaning you will be able to complete essential payments in less time.

This introduction comes alongside a myriad of security improvements as we switch to Global Payments.

Impact to Parents

Parents can add items to their shopping basket and checkout in the usual way. The only difference will be Apple Pay and Google Pay will be presented as payment options when you arrive at the new gateway.

The new gateway also means WisePay is safer than ever whilst still retaining the same interface you're familiar with.

If you have any further questions or need help please visit www.wisepay-software.com

Alternatively you can contact your organisations' WisePay administrator.
