HELP YOUR CHILDREN TO GET MORE FROM THEIR EDUCATION

As a parent you will instinctively want to take an active involvement in your children's education.

But we know everybody has a busy life so understand that it can sometimes be a struggle to keep up with your children's schooling. If your child has additional needs, then this can add a level of complexity that makes everyday activities challenging as well.

Groupcall, an education communications provider has come up with an innovative solution to enable parents easily to become more active in their children's schooling. We know that the majority of parents now have smartphones and tablets and are used to engaging with apps and receiving push messages. So, we have created an app called Xpressions to inform parents all about their children's schooling.

Groupcall Xpressions provides a timeline of activity including messages, learning notifications, homework and classroom achievement from the school to you.

It is free-of-charge to download and offers two-way messaging, so that when you see an important post you can respond. It's also interactive, so the school can send you images of your children 'scoring that goal', creating some brilliant artwork, or just being amazing, through to less exciting but just as important reminders for exams, school trips or forgotten PE kit.

The real power of Xpressions is demonstrated if you have several children across different schools because it's one timeline for all your children, no matter which school they attend (provided all your children's schools use Groupcall services). Your Xpressions timeline could include notification that your son has been marked with a B for Creative Writing in English, your daughter has made a lunch purchase for a chicken salad and has a remaining balance of £5.40 or even that the school's fete will be this Saturday so don't forget to buy your raffle tickets! It keeps you engaged in your children's education and allows you to perform tasks such as making payments and managing your time at events such as parents' evenings.

STUDENT INFORMATION AUTOMATICALLY SENT DIRECTLY TO YOUR MOBILE PHONE

XPRESSIONS

TIMETABLE, ACHIEVEMENT AND ASSESSMENT INFORMATION

Xpressions provides instant, 'real-time' information about your child's timetable, attendance marks, behaviour and achievements as well as assessment results. Based in the app's timeline, it is easy to find and understand. So no more waiting until the end of term report, or open evening to find out how your children are doing.

ONE STOP SHOP FOR ALL YOUR INFORMATION NEEDS

Xpressions has been designed to ensure that parents have the ability to be always informed by just one app, about almost everything concerning your child's education, in close to real time.

A FLEXIBLE AND INTERACTIVE APP

Xpressions uses mobile push messages to send messages to your timelines, saving your school money compared to sending text messages.

FREE OF CHARGE AND AVAILABLE IN THE APP STORE, PLAY STORE, WINDOWS STORE

Xpressions is completely free of charge for parents and can be installed on your mobile phone or tablet. It currently supports both Apple iOS, Windows Mobile and Android devices (with Windows mobile to follow).

PARENTAL LOGIN

It's easy and secure for parents and legal guardians to sign into the app. All you need to do is confirm your email address and mobile phone number details with your child(s) school(s) for them to register you. You then use your email address and mobile phone number, sidestepping much of the traditional complexity to login. This is referenced against the data held in the school's MIS.

SCHOOL SYSTEMS INTERACTION THROUGH XPRESSIONS

An important aspect of Xpressions is that it is designed to pick up and deliver communications from educational software providers. If a school utilises a library system, a parental payment system, or an in-class system such as homework, then these systems could be enabled to communicate with you through Xpressions, such as Parents' Evening Booking System and Parent Paperwork.
